P1/P2 Incident Lead

20% Faster Resolution

Shift POC / Team Lead

PROFESSIONAL SUMMARY

Results-oriented L2 Technical Support Engineer with 3.5 years of hands-on experience supporting enterprise SaaS platforms — specializing in Pega Systems and Salesforce CRM. Certified Pega System Architect (CSSA) with a strong command of incident management, root cause analysis, and production support operations. Demonstrated ability to lead shifts, mentor L1 teams, and serve as primary escalation point for mission-critical P1/P2 issues. Delivered measurable impact including a 20% reduction in resolution time, 99.9% system uptime, and consistently outstanding CSAT scores of 95%+. Actively seeking a challenging L2/L3 support or application support role to drive operational excellence.

PROFESSIONAL EXPERIENCE

L2 Technical Support Engineer | Cognizant Technology Solutions Oct 2022 – Present | Hyderabad, India

- ▶ Deliver advanced L2 support for enterprise Pega and Salesforce applications, resolving complex incidents escalated from L1 teams across global clients.
- ▶ Serve as Shift Point of Contact (POC) for P1/P2 high-priority incidents — coordinating triage, stakeholder communication, and escalation to L3 developers for permanent fixes.
- ▶ Spearheaded the end-to-end technical support for a large-scale Google to G Fiber migration, including software configuration, backend tool validation, and post-migration stability monitoring.
- ▶ Achieved and sustained a Customer Satisfaction (CSAT) score of 95%+ by delivering expert, empathetic, and timely resolutions to global enterprise clients.
- ▶ Reduced average ticket resolution time by 20% through authoring detailed "How-To" guides, runbooks, and root cause analysis (RCA) reports for the internal knowledge base.
- ▶ Perform in-depth application log analysis, Pega case management troubleshooting, and Salesforce workflow debugging to identify and resolve root causes.
- ▶ Collaborate closely with product engineering and L3 teams to reproduce defects, validate fixes in staging, and confirm production-level resolutions.
- ▶ Manage SLA compliance for all assigned tickets using ServiceNow and Jira, maintaining 98%+ on-time resolution rate.
- ▶ Mentored and upskilled L1 support agents on Pega platform fundamentals, reducing unnecessary escalations by coaching first-call resolution techniques.

TECHNICAL SKILLS

Pega Platform: Pega Systems (CSSA Certified) — Case Management, BPM, Rules Engine, Debugging

CRM: Salesforce CRM — Case handling, workflow troubleshooting, admin-level support

ITSM Tools: ServiceNow, Jira — Incident, Problem & Change Management, SLA tracking

Support Expertise: L2 Application Support, Root Cause Analysis (RCA), Escalation Management, Shift Lead

Specialized Skills: Enterprise Software Migration, Production Support, Knowledge Base Development

Frameworks: ITIL-aligned Incident Lifecycle Management, P1/P2 Incident Coordination

CERTIFICATIONS

Pega Certified System Architect (CSSA)

Pegasystems – 2023

KEY ACHIEVEMENTS

- ▶ 20% Reduction in Resolution Time — Built and maintained a comprehensive internal knowledge base with step-by-step troubleshooting guides, slashing average handle time across the team.
- ▶ 99.9% System Availability — Ensured near-zero downtime across production Pega and Salesforce environments by proactively monitoring systems and coordinating swift incident responses.
- ▶ Google to G Fiber Migration — Led technical support for a high-visibility infrastructure migration, managing configuration changes and ensuring post-migration software stability with zero production incidents.
- ▶ 95%+ CSAT Maintained Consistently — Recognized for superior client communication and expert resolution quality across a global enterprise client base.
